Hazardous Weather

There is a slight chance of thunderstorms this afternoon and evening across parts of southeast New Mexico and West Texas. Frequent lightning, gusty winds, and brief heavy rainfall are possible.

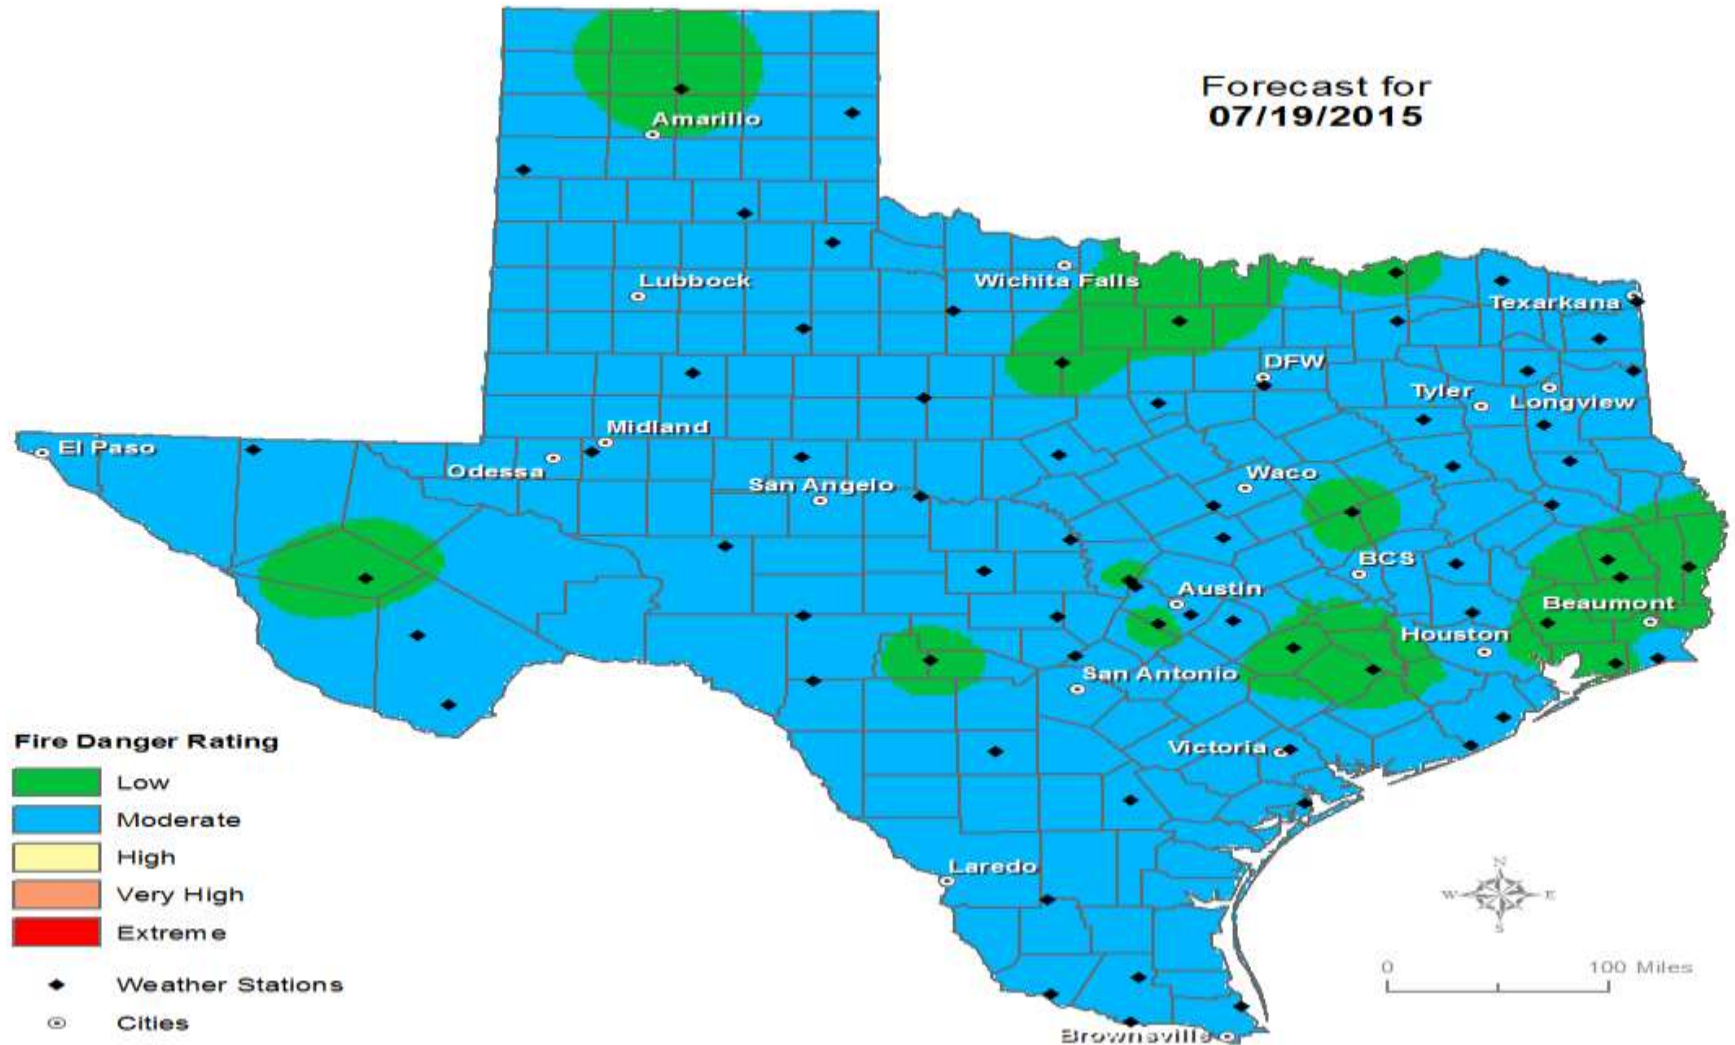

Moist unstable air will continue to flow into New Mexico and west Texas under high pressure aloft. This weather pattern will result in scattered mountain and isolated lowland thunderstorms in the afternoon to early evening. A few of the storms may produce heavy rainfall with localized flooding in the vicinity. Skies will be partly cloudy with west winds of 5 to 10 mph. Temperatures will be near normal with middle to lower 90s across the lowlands with 70s and 80s in the mountains.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
07/18/15	Significant Weather Advisory	Dallam, Hansford, Ochiltree and Sherman Counties
